Islam Abdelrahman

SOFTWARE ENGINEER | FULL-STACK & MOBILE DEVELOPMENT

Dubai, UAE | +971 55 141 7445 | Islam_Abdelrahman@outlook.com
islamabdelrahman.vercel.app | LinkedIn

PROFESSIONAL SUMMARY

Software engineer with two years of freelance experience delivering business websites and web applications. Builds with React, Next.js, TypeScript, and MongoDB; currently developing Parkida, an Android-first parking platform using React Native and Firebase. Experience spans client requirements, implementation, testing, and deployment.

TECHNICAL SKILLS

Web & Mobile: React, Next.js, React Native, Expo, TypeScript, JavaScript, HTML, CSS, Tailwind CSS
Backend & Data: Node.js, Firebase, Firestore, Cloud Functions, MongoDB, SQL, REST APIs
Tools & Integrations: Git, GitHub, Vercel, Cloudflare Pages, NextAuth.js, PayPal SDK

PROFESSIONAL EXPERIENCE

Freelance Web Developer | Dubai, UAE | Feb 2024 - Feb 2026

- Delivered responsive websites and web applications for small businesses, translating client requirements into interfaces and managing database integration, testing, and deployment.
- Built Fullashes, an e-commerce application covering product discovery, customer accounts, checkout, order tracking, and store administration.

Data Entry & Customer Service | Hexaware | Feb 2023 - Feb 2024

- Maintained customer records, resolved inquiries across phone, email, and chat, and troubleshot basic technical issues with escalation when needed.

SELECTED PROJECTS

Parkida | Parking Management Platform | Jun 2026 - Present

React Native, Expo, TypeScript, Firebase | In development | Project link

- Developing an Android-first application with Firestore and Cloud Functions, including owner and attendant workspaces, facility management, parking rates, vehicle check-in/check-out, and reporting.
- Developing assisted plate-recognition workflows with human review and manual entry, Bluetooth ESC/POS receipt printing, and Stripe subscription integration in a sandbox environment.
- Built and deployed an Arabic/English marketing website with right-to-left support and an interactive product walkthrough; mobile application remains in pre-release development.

Fullashes | E-Commerce Application

Next.js, TypeScript, MongoDB, NextAuth.js, PayPal SDK | Project link

- Implemented product search, filtering and sorting, customer authentication and profiles, shopping cart, and order tracking.
- Integrated PayPal checkout and built an administration dashboard with analytics and user management.

CIVIC | Consultancy Website | 2026 | Project link

- Designed, developed, and deployed a responsive website for a Dubai construction project management consultancy, with service pages, navigation, and project inquiry forms.

EDUCATION

B.Sc. in Software Engineering | Eastern Mediterranean University | 2017 - 2022
ABET-accredited Software Engineering program
