SUMMARY

Passionate software engineer with 2 year of experience in web application development. Proficient in debugging, helping elevate user experience, and streamlining internal processes.

EXPERIENCE

WEB DEVELOPER | Feb 2024 — Feb 2026

Freelance – Dubai

Developed and delivered web applications for small businesses, translating client requirements into responsive, functional solutions. Managed development, database integration, testing, and deployment throughout the project lifecycle.

DATA ENTRY & CUSTOMER SERVICE |Feb 2023 — Feb 2024

Hexaware - Dubai, UAE

During my role at Hexaware, I was responsible for entering, validating, and maintaining large volumes of customer data with a high degree of accuracy. I handled customer inquiries through phone, email, and chat, providing clear and timely support while troubleshooting basic technical issues and escalating complex cases when needed. I also managed customer account updates, ensuring records stayed current and accurate. This position strengthened my communication, problem-solving, and organizational skills in a fast-paced, high-volume environment.

PROJECTS

WEB DEVELOPER | 2026

Designed, developed, and deployed CIVIC Project Management, a responsive, multi-page corporate website for a Dubai-based construction consultancy. Built a modern, user-friendly interface with intuitive navigation, interactive project galleries, detailed service pages, and structured client inquiry forms. Focused on responsive design, accessibility, consistent UI/UX, and maintainable code to deliver a professional digital presence. Deployed the website using Vercel.

FULL-STACK & MOBILE APPLICATION DEVELOPER | Jun 2026 — Present

Designed and developed Parkida, an Android-first parking management SaaS platform combining a mobile application, cloud backend, and marketing website. Built multi-facility management, role-based access control, vehicle check-in/check-out workflows, occupancy tracking, payment records, and operational dashboards. Developed Firebase-backed services using TypeScript, Firestore, and Cloud Functions, alongside Android features including assisted license plate recognition and Bluetooth receipt printing. Integrated Stripe subscription functionality in a sandbox environment and deployed a responsive, bilingual Arabic/English marketing website.
